CANONICAL SOURCE OF TRUTH

Supersedes all prior palette documentation

Version 2.0

Print edition

HOW TO USE THIS

Sections 01 and 02 are the studio and its structure — read those to understand what we do and who does it. Sections 03 through 07 are the system itself. Sections 08 through 10 show it applied and set the rules that keep it intact.

If you are briefing us — start at 01. It tells you what the studio makes and which industries it works in.

If you are producing for us — 03 through 07 are binding. Every value is measured, not asserted.

If you are auditing an asset — 10 carries the checklist and the full contrast matrix.

01	The studio	Services and industries	03
02	Architecture	Seven entities	06
03	Core palette	Five and two	07
04	Signatures	One swatch each	10
05	The marks	Monochrome, always	11
06	Typography	Three families, closed	13
07	Layout & motion	The 25° discipline	16
08	Applications	The system, working	17
09	Microsoft 365	Workplace surface	19
10	Governance	Keeping it true	20

THE SYSTEM IN ONE LINE

Five chromatic values and two contrast bookends. One signature swatch per entity. Three typefaces, closed. Marks monochrome on transparent. Four inks maximum per composition.

WHAT WE MAKE

Vasey Multimedia builds two things that usually live in different buildings: records and software. The studio runs both because the disciplines borrow from each other — an arrangement is an interface, a mix is a hierarchy of attention, and both fail the same way when nobody decided what the listener should notice first.

20+

Years in production, sound design and engineering

7

Operating entities under one house

2

Disciplines — audio and software, run as one practice

1

Standard, documented here and applied without exception

Signal over decoration

Every colour, rule and glow encodes something. A beam is a playhead. An accent is a state. If a mark cannot say what it means, it is removed.

One voice, many rooms

Entities differentiate through a single accent and typographic treatment, never through new typefaces or competing palettes.

Measured, not asserted

Every value in this document is either supplied directly or extracted from master artwork. Nothing was chosen on taste alone.

SERVICES

01

Brand identity & design systems

Marks, palettes, type systems and the tokens that make them enforceable. Documented to the standard you are reading, not a deck that goes stale in a quarter.

IDENTITY TOKENS WCAG

02

Web & progressive apps

Next.js and TypeScript front to back. Installable, offline-capable, deployed to the edge, shipped with governance that keeps it maintainable after handoff.

NEXT.JS TYPESCRIPT PWA EDGE

03

Native & cross-platform

iOS and SwiftUI work where the platform earns it — safe areas, adaptive icons, share targets and the WebKit constraints that catch teams out late.

SWIFTUI IOS WEBKIT

04

AI-augmented product

Model routing, prompt architecture and agentic workflows built as products rather than demos — cost ceilings, fallbacks and server-side keys from day one.

LLM MULTI-MODEL AGENTIC

05

Music production & composition

Original writing, arrangement and production across genres. Beats, scores and full records, delivered with stems and documentation.

PRODUCTION ARRANGEMENT SCORING

06

Sound design & sonic branding

Synthesis, foley and processing for picture, product and interface. Earcons treated with the same rigour as a visual identity, because they carry the same weight.

SYNTHESIS FOLEY EARCONS

07

Mixing & mastering

Mixed on monitoring that tells the truth and mastered for where it will actually be heard. 24-bit deliverables with stems, alternates and instrumentals as standard.

24-BIT STEMS STREAMING

08

Commerce & licensing

Storefronts, payment and digital delivery for creative businesses — licence tiers, contract generation and files that arrive the moment payment clears.

STOREFRONT LICENSING DELIVERY

INDUSTRIES

The work sits at the seam between creative and technical industries. That is deliberate — a label needs software, a software company needs sound, and very few studios can hold both conversations without a subcontractor in the middle.

What a typical engagement looks like

Most work starts with a brief that has one clear half and one vague half — a product that needs a sound, or a catalogue that needs a storefront. We scope the vague half first, because that is where the cost lives.

What we hand over

Source files, tokens, documentation and the governance to keep it consistent after we leave. No asset ships without its specification, and no specification ships without the numbers behind it.

STAGE 01 Scope the vague half Most briefs arrive half-defined. We start by pinning the undefined half, because that is where the cost and the schedule risk actually live.	STAGE 02 Establish the system Palette, type, tokens and constraints — decided once and written down, so every later decision is an application rather than a debate.	STAGE 03 Build against it Production runs to the specification. Contrast, geometry and export rules are verified rather than assumed, and the numbers are recorded.	STAGE 04 Hand over governed Source files, tokens and the checklist that keeps it intact. The work should still look right two years after we stop touching it.
--	--	---	--

ONE HOUSE, SEVEN DOORS

Every entity runs on the same CORE palette and the same three typefaces. Where an entity differs, it differs by *one swatch*. Most have no signature at all — that is the intended default, not a gap.

ENTITY	CODE	WHAT IT DOES	SIGNATURE	LOCKUP
 Vasey Multimedia	VM	Corporate parent. Owns the CORE palette, the master mark and this document.	 #00B8D9	Bebas +0.14em
 Sean Vasey Productions	SVP	Authored music, production credit and engineering. Records, scores, mixes, masters.	CORE-centric · none	Bebas +0.34em
 VASEY.AUDIO	V . A	Beat marketplace and sound library. Storefront, licence tiers, instant delivery.	 #454CFC	Bebas +0.02em
 Vasey Music Group	VMG	Rights, licensing administration and label operations. Runs outside CORE.	 #FF5D45	Reddit Sans 600
 Project DIGITAL	P D	Experimental technology lab. CORE colours with light green as the one strong accent.	 #A7FC44	Bebas +0.08em
 VASEY/AI	V / AI	Generative and LLM modalities. Prompt architecture, model routing, lab products.	 BEAM #22E8F5	Bebas +0.10em
 VASEY/DEV	V / DEV	Development studio. Web and native engineering for the group and for clients.	CORE-centric · none	JetBrains Mono 600

VASEY/DEV uses the parent monogram with a suffix — it is the house studio, not a separate house. VMG is the only entity permitted outside CORE, and uses no blues and no turquoise.

FIVE AND TWO

Five chromatic values and two contrast bookends. That is the entire brand palette. Everything runs 189° to 240° — a fifty-degree band of turquoise through blue — which is what lets any two sit together, or blend, without a decision.

PRIMARY	SECONDARY	FIELD	BRIDGE	ACCENT	BOOKEND · LIGHT	BOOKEND · DARK
TURQUOISE #00B8D9 Headers, primary action on dark, iconography, top of the gradient.	TEAL #397281 Dark cyan. Structure, bands, and the light-mode action colour.	DEEP TURQUOISE #052E3A Native background. Tinted, so the brand reads in empty space.	NAVY #191970 Gradient bridge and mesh anchor. Resolves blue into turquoise.	ACCENT BLUE #454CFC Emphasis and interaction. The VASEY.AUDIO signature, elevated.	SILVER #C9D0D3 Near-white. Body text on dark, surfaces and dividers on light.	CHARCOAL #29363F Near-black. Body text on light, elevated surfaces on dark.
6.07 field 2.37 white	5.39 white	14.40 white	14.85 white	5.69 white	7.94 charcoal	12.40 white

THE BOOKENDS DO THE HEAVY LIFTING

Silver against Charcoal measures **7.94:1 in both directions** — a fully reversible AAA pair that carries every piece of body copy without a third neutral. That is why the palette needs no grey ramp: anything between the bookends is a surface tint, not a colour.

TERTIARY — USED SPARINGLY

Dark Red · #532E2A

VMG companion. 11.72 on white.

Light Green · #A7FC44

PJD accent. Dark fields only.

GRADIENT & MESH

Navy exists so the run from blue to turquoise resolves smoothly. Without it the 49° jump between Accent Blue and Turquoise reads as two colours meeting; with it, the whole spectrum behaves like one material.

#191970 NAVY #454CFC ACCENT BLUE #00B8D9 TURQUOISE #397281 TEAL

```
linear-gradient(115deg, #191970 0%, #454CFC 26%, #00B8D9 62%, #397281 100%)
```

Applying the core

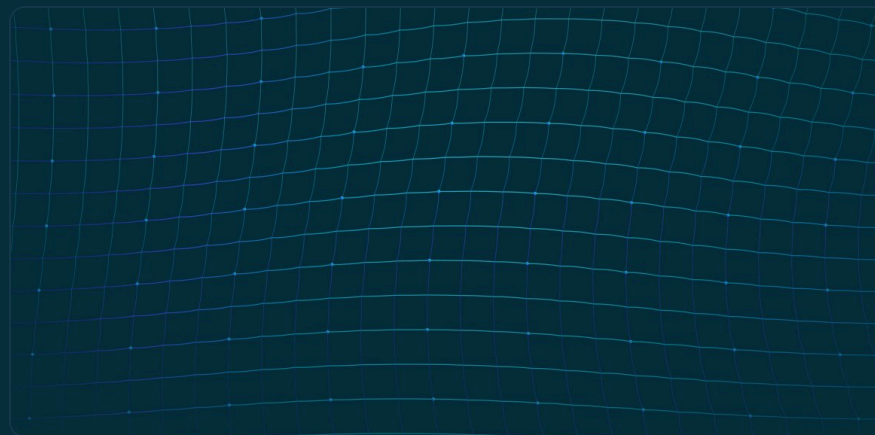

Turquoise fills carry dark ink

White on Turquoise is 2.37:1 and fails. Charcoal on Turquoise is 5.23:1 and passes. Where a turquoise fill carries a label, the label is Charcoal — not white.

Teal is the light-mode action

Turquoise cannot carry text on white. Teal reaches 5.39:1 in both directions, so it takes over links, buttons and focus states wherever the field is light.

THE MESH

The gradient rendered as wire. Behind hero moments and section transitions only — never behind body copy without a radial scrim. It is the one ornamental device in the system, and it earns its place by carrying the palette rather than decorating it.

Accent Blue needs a light or deep field

On white it is 5.69:1 both ways. On Charcoal it collapses to 2.18:1. Use it as text on light, or as a large fill with white ink — never as text on a mid-dark surface.

Navy is structural, not decorative

It appears in gradients, meshes and deep fields. It is not a button colour and not a text colour outside a white field, where it is 14.85:1.

ONE SWATCH, NOT A PALETTE

A signature is a single colour an entity may accent with. It does not come with a family, a set of tints, or a licence to recolour the mark. Most entities have none — they run on CORE and differentiate through typography and treatment.

VM

Vasey Multimedia

CORE primary. The parent has no signature separate from the palette it owns.

SVP

Sean Vasey Productions

No signature. CORE-centric, with colour carried by the mark itself.

V.A

VASEY.AUDIO

Accent Blue, elevated from CORE. The storefront leans on it; the mark does not become it.

VMG

Vasey Music Group

Tomato with Dark Red and monochrome. Outside CORE — no blues, no turquoise.

P | D

Project DIGITAL

CORE plus Light Green as the strong accent. The pipe in the wordmark is always green.

BEAM

VASEY/AI

BEAM, measured off the master render at hue 184°. Accent and glow only.

V/DEV

VASEY/DEV

CORE-centric. Differentiates through the monospace lockup, not colour.

RULE

A signature appears **at most once per composition**. Two appearances make it a second primary, and the eye stops reading it as information.

MONOCHROME, ALWAYS

THE RULE

Every mark is white or black on a transparent background. A signature colour may accent a single element — a slash, a period, a pipe, a glow — but it never fills the mark. A mark rendered in its signature colour is incorrect, no matter how well it reads. The one exception is the Sean Vasey Productions colour lockup, supplied pre-coloured and used as-is over any field it contrasts against.

PIPE ALWAYS GREEN

POSITIVE & GEOMETRY

Never

Geometry

MARK	VIEWBOX	RATIO	MIN DIGITAL	MIN PRINT
Vasey Multimedia	688 × 592	43:37 Locked	28px	10mm
VASEY/AI	1000 × 728	1.3742	28px	10mm
VASEY.AUDIO	1000 × 874	1.1443	24px	8mm
Vasey Music Group	1000 × 1033	0.9677	32px	12mm
SVP (mono)	1000 × 836	1.1961	40px	15mm

THE 43:37 LOCK

Only the parent monogram has a locked ratio, and 43:37 is irreducible — it cannot be simplified into a friendlier number, so it cannot be casually approximated. Verify any instance by cross-product: **width × 37 must equal height × 43**. The traced master measures 1659 × 1427 px — 61,383 against 61,361, a deviation of 0.036%.

The other four ratios are measurements, not constraints. Never non-uniformly scale any mark.

Clear space — one quarter of the mark height on all sides. **Permitted** — uniform scale, translate, rotate. **Forbidden** — non-uniform scale, skew, independent stretch, outline weight change, node editing, signature fill.

THREE FAMILIES, CLOSED

The type system is shared by every entity without exception, and it is closed — no campaign, product or sub-brand introduces a fourth family. Alongside the CORE palette, typography is the primary carrier of the identity. Entities differentiate through case, tracking, weight and which face leads.

DISPLAY

Bebas Neue

AG 42

Condensed, all-caps, one weight. Carries headlines, kickers and every lockup. Its narrowness is the feature — a long entity name sits at display size without wrapping.

RULE

Bebas Neue never appears below 17px and never in sentence case. One display size per composition — two reads as indecision.

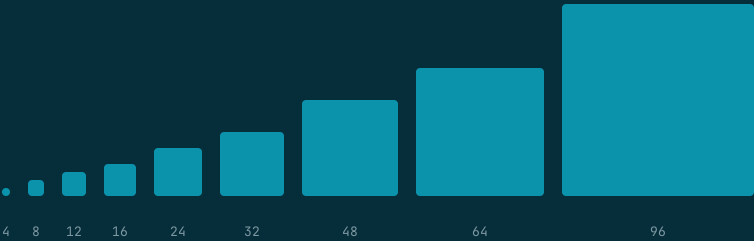

THE 25° DISCIPLINE

TWELVE COLUMNS • 1440 MAX • 24 GUTTER

Margins 96 / 48 / 24. Reading column never exceeds 75 characters regardless of viewport.

SPACING — 4PX BASE

Motion

NAME	DURATION	EASING	USE
Instant	120ms	standard	Toggles, colour shifts
Quick	200ms	standard	Hover, focus, button state
Base	320ms	entrance	Panels, drawers, mode change
Slow	560ms	entrance	Page transition, hero
Beam	1200ms	standard	Signature only — playhead, scan

THE BEAM — FIXED AT 25°

The only diagonal in the system. Divider, playhead, progress spine, card edge. Never mirrored, never another angle.

Easing curves

standard — cubic-bezier(.22, 1, .36, 1)
entrance — cubic-bezier(.16, 1, .30, 1)
exit — cubic-bezier(.40, 0, 1, 1)

Nothing bounces. Motion describes signal travel, not personality. `prefers-reduced-motion` is always honoured, and layout never depends on animation to be legible.

THE SYSTEM, WORKING

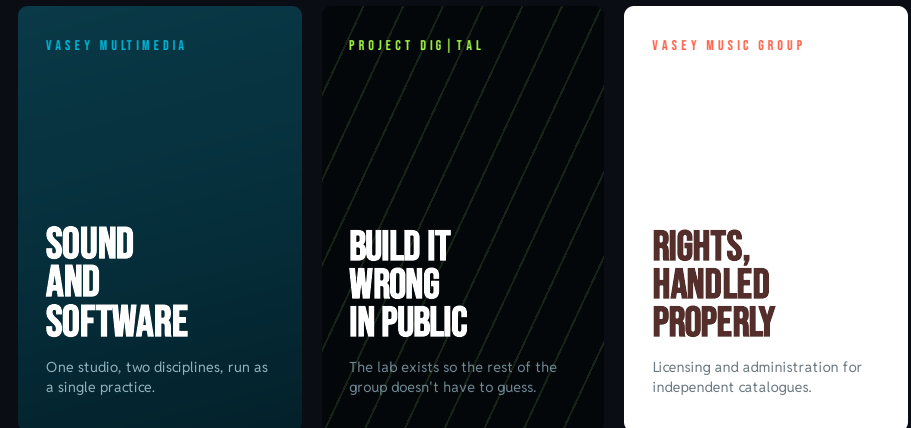

Every surface here is built from the CORE palette and the three typefaces alone. Count the colours: nothing uses more than four inks, no mark is filled with its signature, and each signature appears at most once per frame.

WEB • VASEY.AUDIO STOREFRONT

Four inks: Deep Turquoise field, Turquoise action, Accent Blue signature, Silver text. The playhead is the beam at 25°.

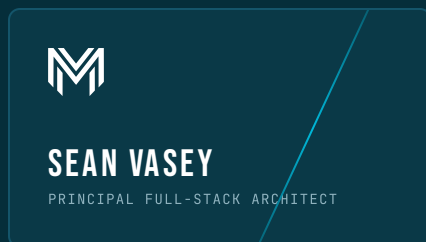

PRINT • POSTER SERIES

Three entities, three fields, one type system. VMG runs light and warm because it is the only entity outside CORE.

STATIONERY & ICONS

BUSINESS CARD • 600GSM UNCOATED, DUPLEXED

Front prints Deep Turquoise with the beam as a spot gloss varnish at 25° — a varnish, not an ink. Back prints Charcoal on natural white. Never foil the monogram.

COLOUR SPACE

This system is authored and delivered in **sRGB**. Every value in this document is an RGB value, and every contrast figure is computed in sRGB. Screen, web, application and digital delivery are the intended output.

APPLICATION ICONS

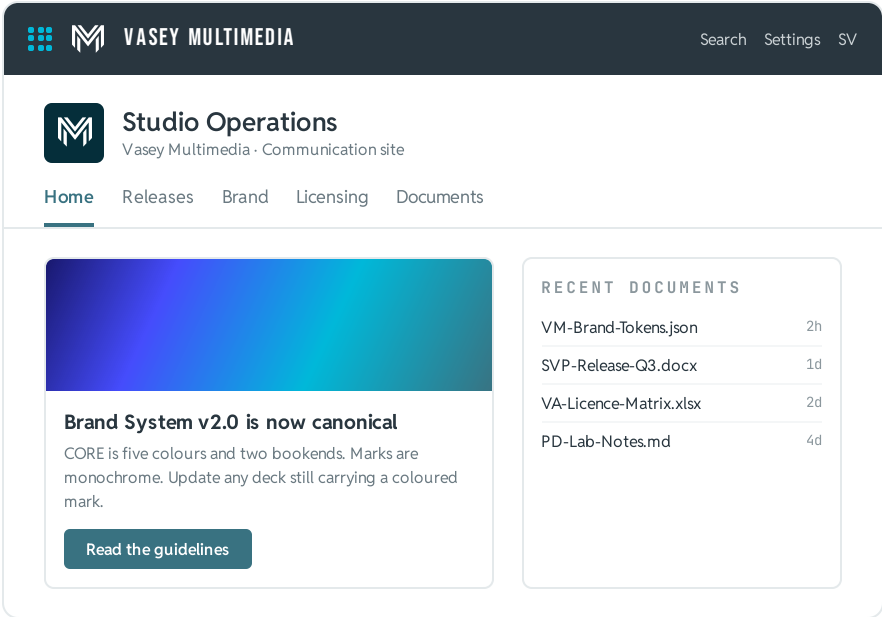

Marks stay white on every tile. **The tile carries the colour; the mark never does.**

EXPORT — NON-NEGOTIABLE

Every rasterised PNG preserves the transparent background from its source SVG. iOS 18 and later use that transparency for adaptive Home Screen tinting, and an opaque background breaks it. Ship 1024 / 512 / 384 / 192 / 144 / 96, apple-touch 180 / 167 / 152 / 120, favicon 32 / 16 / .ico — all transparent, manifest carrying both `any` and `maskable`. Mark occupies 76% of the frame.

THE WORKPLACE SURFACE

Corporate surfaces use CORE only — entity signatures never appear in tenant-wide theming. SharePoint binds its link colour and filled-button colour to `themePrimary`, which must clear 4.5:1 against white. Turquoise is 2.37:1 and fails there. Teal is 5.39:1 and takes the slot.

Admin centre mapping

FIELD	TOKEN	VALUE	VERIFIED
Nav bar background	Charcoal	#29363F	White at 12.40:1
Text and icon	White	#FFFFFF	12.40 AAA
Accent colour	Teal	#397281	5.39 AA
App launcher	Turquoise	#00B8D9	Large fill — safe
Default logo	VM horizontal	200 × 48	Under 10 KB, transparent

HARD STOP

Never place Light Green or BEAM in the accent field — 1.26:1 and 1.51:1 on white. The admin centre warns below 4.5:1 and allows an override; treat the warning as a hard stop.

SHAREPOINT DEPLOYMENT

`themePrimary` is #397281 in the light theme and #00B8D9 in the inverted dark theme. Deploy with Add-SPOTheme as SharePoint Administrator, primary geo only. Adding a theme does not apply it — site owners select it under Change the look. Hub-associated sites inherit hub branding, so deploy the hub theme first.

CONTRAST MATRIX

Read a low figure as a guardrail, not a defect. Most pairs in this table are combinations the system never asks for. The outlined cells are each token's designed pairing — that is where the colour is meant to live, and every one of them clears its threshold.

 Designed pairing
 AAA ≥ 7:1
 AA ≥ 4.5:1
 AA lg ≥ 3:1 large / UI
 Fail not a permitted pair

TOKEN	HEX	WHITE	SILVER	TEAL	CHARCOAL	DEEP TURQ
Turquoise	#00B8D9	2.37 Fail	1.52 Fail	2.27 Fail	5.23 AA	6.07 AA
Teal	#397281	5.39 AA	3.45 AA lg	1.00 Fail	2.30 Fail	2.67 Fail
Deep Turquoise	#052E3A	14.40 AAA	9.22 AAA	2.67 Fail	1.16 Fail	1.00 Fail
Navy	#191970	14.85 AAA	9.51 AAA	2.76 Fail	1.20 Fail	1.03 Fail
Accent Blue	#454CFC	5.69 AA	3.64 AA lg	1.06 Fail	2.18 Fail	2.53 Fail
Silver	#C9D0D3	1.56 Fail	1.00 Fail	3.45 AA lg	7.94 AAA	9.22 AAA
Charcoal	#29363F	12.40 AAA	7.94 AAA	2.30 Fail	1.00 Fail	1.16 Fail
Dark Red	#532E2A	11.72 AAA	7.50 AAA	2.18 Fail	1.06 Fail	1.23 Fail
Light Green	#A7FC44	1.26 Fail	1.24 Fail	4.27 AA lg	9.83 AAA	11.42 AAA
BEAM	#22E8F5	1.51 Fail	1.04 Fail	3.57 AA lg	8.22 AAA	9.55 AAA
Tomato	#FF5D45	3.04 AA lg	1.95 Fail	1.77 Fail	4.08 AA lg	4.73 AA

Computed with the WCAG 2.x relative-luminance formula. Sixteen designed pairings, sixteen clearing threshold. Tomato is the only signature restricted to large elements and fills — Dark Red carries VMG body copy at 11.72:1.

KEEPING IT TRUE

A brand system decays through reasonable exceptions. Each one is defensible alone and the accumulation is fatal. These are the checks that keep CORE at five plus two and the type at three families.

Every asset

- Four inks maximum
- One signature per frame
- Mark is monochrome on transparent
- No fourth typeface
- Zero emojis

Every interface

- Body $\geq 4.5:1$, UI $\geq 3:1$
- Turquoise fills carry Charcoal ink
- Teal is the light-mode action
- Accent Blue never text on Charcoal
- Both modes checked

Every export

- Transparent background preserved
- Full size suite generated
- Manifest has any + maskable
- Mark at 76% of frame
- No baked-in solid colour

Change control

- A new colour requires a retirement
- CORE stays at five plus two
- Signatures are one swatch, never a palette
- Version bump on any token change
- This document is the only source of truth

OPEN ITEMS

- **SVP has two marks.** The distressed monochrome master shown here, and a newer pre-coloured lockup supplied as raster. The colour lockup needs a native vector before it can be published as primary.
- **BEAM value needs confirmation.** #22E8F5 is measured from the master render's glow at hue 184°. The legacy BEAM token was #4BC2F0. One should retire.
- **Delivered in sRGB.** The system is authored for digital output. Any future press work would need its own colour-space pass; nothing here is specified for four-colour process.
- **Semantic states not yet defined.** Error cannot simply borrow Tomato, which collides with the VMG signature.

RETIRED IN V2.0

Fifteen values were retired to reach five plus two. The four legacy limes — #B7FF3C, #CCFF00, #DFFA04, #C0FF5A — consolidated into #A7FC44. The v1x near-duplicate neutrals #1C2B33, #C7D0D4, #3E5C76 and #E7EBEC resolved into the two bookends. The synthesised entity companions #2F35C4, #0894A8, #B3301E and #00778A were removed entirely — a signature is one swatch, and the CORE values already pass unaided.

The full retirement log lives in `vasey-tokens.json`.

VASEY MULTIMEDIA

Contrast values are computed with the WCAG 2.x relative-luminance formula.
Mark geometry is vectorised from master artwork and validated by cross-product
against the locked 43:37 ratio. This document supersedes all prior palette
documentation.
